Microsoft Word, Microsoft excel, Microsoft power point

---

## Project

Solar based high efficient vacuum cleaner capable of capturing even 40 microns. small dust particles

A vacuum cleaner, also known as a Hoover or sweeper and commonly referred to simply as a vacuum, is a device that uses an air pump to create a partial vacuum to suck up dust and dirt, usually from floors. The dirt is collected by either a dust bag or a cyclone for later disposal. In general we are using direct electrical power supply to the vacuum cleaner.
