Project

Solar Based High Efficient Vacuum Cleaner,
Capable of Capturing Even 40 Microns.Small Dust Particles

A vacuum cleaner, also known as a Hoover or sweeper and commonly referred to simply as a vacuum, is a device that uses an air pump to create a partial vacuum to suck up dust and dirt, usually from floors. The dirt is collected by either a dust bag or a cyclone for later disposal. In general, we are using the direct electrical power supply to the vacuum cleaner.
